IN THE ABSTRACT:

Applicants have provided herewith a replacement abstract on a separate sheet. The original abstract has been amended as follows:

--Abstract

~~The invention relates to a~~ A paste unit and method of
glue metering therein for a bottom guide device for star seal
bottom bags, which are formed from tube sections, for gluing of
bottom warps or star seal bottom bags. The paste unit includes,
~~and has at least the following characteristics:~~
a glue reservoir (4), ~~and/or a glue source,~~ a metering roller (3),
~~which is~~ connected with the glue reservoir (4), a glue application
roller (2), which may be connected to the glue reservoir (4) ~~or the~~
~~glue source,~~ and a making roller (1), ~~which is~~ connected to the
glue application roller (2), ~~and which transfers glue (7) from the~~
application ~~this~~ roller (2) to the bottom warps or the star seal
bottoms. Drive ~~means are~~ mechanisms assigned to the above listed
rollers (1, 2, 3). ~~The paste unit of the bottom guide device~~
~~described above is characterized in that~~ enable the circumference
speed of the glue application roller (2) and of the making roller
(1) ~~can to~~ to be adjusted independently of one another.
